Career Objective

Enthusiastic and curious engineering graduate with a passion for learning and innovation, seeking an opportunity to work on real-world projects where I can apply my skills, grow through hands-on experience, and contribute meaningfully to the team and organization.

Education

-
- Bachelor of technology in computer science and engineering(AIML) at Gokaraju Rangaraju Institute of Engineering and Technology (2022-2026)
 - CGPA:9.0/10

Skills

Languages & Frameworks: Java, C, Python

Web Technologies: HTML, CSS

Tools: VS Code

Problem-Solving: Solved 100+ Leet Code problems (Rating: 1300+) ([LeetCode](#))

Concepts: Data Structures & Algorithms

Projects

Disease prediction And Nearby Hospital Recommendation | Python, Flask

Built a web-based chatbot using ML and NLP to predict diseases from user symptoms. Integrated hospital location mapping based on user coordinates.

Agri Tool Rental Platform | React.js (In Progress)

Engineered a platform to empower farmers with tool-sharing capabilities, featuring authentication and search; prototyped at Hackfiniti hackathon, earning praise for addressing rural needs. [Demo: In Progress]

Certifications

-
1. Machine Learning (Ongoing) – Cantilever Labs
 2. Intermediate Data Structures & Algorithms – Smart Interviews
 3. C Programming, Python Basics – Cisco
 4. AI-ML Virtual Internship (AICTE) -Google

Extracurricular & Achievements

-
- **Hackfiniti Hackathon:** Led development of Agri Tool Rental platform, recognized for innovative solution to improve rural agricultural accessibility.
